ENVIRONMENTAL POLICY

McCormack Benson Health & Safety Ltd are committed to continual improvement in our environmental performance, with attention to the following issues, we will:

- Meet or exceed relevant environmental regulations and laws and other compliance obligations.
- Monitor and investigate any environmental incidents or complaints and review and improve our procedures, where necessary, to improve our performance and mitigate any future incidents.
- Develop management processes and operational practices to protect the environment and prevent pollution.
- Continually improve levels of environmental protection, minimise waste and use resources efficiently throughout the organisation.
- Monitor and control our carbon emissions, through our proactive transport and travel planning and our efficient use of energy.
- Communicate information on our environmental management system, including policy, procedures and performance to all employees and make this available to interested parties.
- Increase knowledge and consciousness about environmental issues among all employees.
- Consider environmental impacts when purchasing goods and services, and work with suppliers and clients to promote environmental protection
- Consider climate change mitigation and adaptation, resource constraints and other changing environmental conditions when planning our business activities and service delivery, and promote resilience where relevant
- Implement an integrated approach to Environmental and Quality issues.
- Provide appropriate resources to meet these commitments.

This Environmental Policy is a corporate statement of our commitment to comply with the applicable requirements of ISO 14001 and the desire for continual improvement in all aspects, including the improvement of the management system processes. It provides a framework for the development of objectives based on the strategic direction of the business.

Andrew McCormack
Managing Director
